

*“Put It Forward gives me the ability to do data magic for every department and customer.”*

Udo Waibel - CTO Sitecore

## Connect through LinkedIn®

Put it Forward® is the solution that Oracle Eloqua® users look for to deepen their lead quality and engage their LinkedIn® community. This lets a user reach a professional audience and to enrich your lead database.

Common Scenarios:

- Use LinkedIn® to enrich lead information in Eloqua® for better campaigns. For example pull the persons title, company details and location information in.
- Send personalized messages from your campaigns directly into LinkedIn®
- Connect with invites directly after an event such as registering or becoming a lead.
- Share content into the LinkedIn® network updates. Allows users to consume insights and content you share.
- Put content into group discussions and pull group content into Eloqua®
- Access company profiles and updates which can be pulled in for tracking.

## Eloqua® and LinkedIn® Simplified

Put it Forward® enables the rapid connection and collaboration of business systems through on demand technology.

Designed for the marketing analyst, evangelist or operations specialist, Put it Forward's® “No Code” graphical experience accelerates and simplifies the ability to work with data.

Extend beyond connecting into operations governance, data quality and customer life cycle management. All within the same application.

Pre-Built Connections from Put it Forward® enable Oracle Eloqua® users to rapidly connect to other systems such as Twitter®, Salesforce®, SAP®, Microsoft Dynamics®, Netsuite® and many more. Helping improve operations, increase data quality and minimize IT costs while enabling their goal of having a deeper more meaningful customer experience.
