Director of Operations and Technology

SAP® Integration Simplified

Put it Forward® enables the rapid integration and collaboration of business systems through on demand technology.

Designed for the business analyst, architect or technical developer, Put it Forward’s® “No Code” graphical experience accelerates and simplifies system integration.

Extend beyond integration into data governance, service orchestration and api management. All within the same application.

Common Scenarios:

- Connect cloud and on-premise based systems to SAP®.
- Add efficiencies to the lead to cash process by connecting SAP® to your front office
- Automate business processes by synching core data like pricing and customer across systems
- Enable reliable and consistent reporting across business functions
- Reduce costs by enabling two-tier ERP by connecting SAP® to departmental or cloud systems
- Reduce costs by connecting remote locations

Create Access - Create Value

Put it Forward® is the solution that SAP® users look to for the single view of their business. This lets a user integrate their sales, customer, inventory, reporting and analytics with any other in house or cloud based system.

Pre-Built Connections from Put it Forward® enable SAP® users to rapidly integrate to other systems such as Oracle®, Sitecore®, Salesforce® and many more. Helping improve efficiencies, reduce data errors and minimize IT costs while enabling their goal of having fully integrated and synchronized customer information across businesses processes.

Point, Click, Get Your Data

Shortcuts to working with your data: if you want to do a data load, synchronize across systems, export, add data quality checks or activity govern your data there are three easy steps to start with.

1. **Point the pre-built connectors** from Put it Forward® or use your own connector to automatically integrate the source and destination.
2. **Click on the data services** or add any business rules, transformations to the integration.
3. **Get the data flowing** between the source and destination by selecting the integration interval and activating it.

Done!

No expensive developers, costly middleware or lengthy hardware deployments.

Key Benefits

- Built for the cloud - Put it Forward® is a purpose built pure cloud based data service tool. No open source, no fat clients, no legacy
- Pure cloud based – on premise to cloud integration with no installation for you to deploy and manage
- Best Price - On demand per connection pricing and low maintenance costs
- Complete suite of out of the box connectors plus data services
- Superior support model – dedicated resources for each of our customers

Features

- **Multi-frequency Integration:** real time, just in time or in batch cycles
- **Great for data loading** and long running processes like order to cash
- **Integrated data quality** and management
- **Stay synchronized** with other organization units, legacy systems, other cloud offerings or on-premise applications
- **More Connectors** to marketing automation, financials or other contacts and order/invoice systems
- **Pure cloud based** - no installation of hardware or software for you to deploy and manage
- **On demand per connection pricing** and low maintenance costs
