

“The shortest path to improved marketing effectiveness, improved lead volume, increased conversion rate and low attrition is via marketing and sales data management.” - Glenn Coward / Founder CS

Get Social - Get Deeper

Put it Forward® is the solution that Oracle Eloqua® users look at to rapidly acquire new insights from social sources like Twitter®. This lets a user deepen their understanding and manage relationships throughout an integrated campaign across their business processes.

Common Scenarios:

- Track Twitter® keywords across multiple campaigns and through multiple re-Tweets
- Expand contact lists by finding new sources that are talking about your subject
- Identify subjects that your competitors are discussing
- Find new influencer's for your product or service
- Target event or locations specific scanning of key words in social streams
- Track discussions during industry events
- Enhance contact information with the latest social information

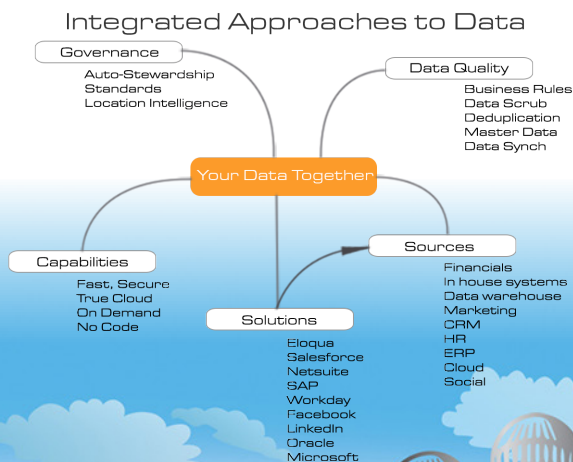

Eloqua® and Twitter® Connections Simplified

Put it Forward® enables the rapid connection and collaboration of business systems through on demand technology.

Designed for the marketing analyst, evangelist or operations specialist, Put it Forward's® “No Code” graphical experience accelerates and simplifies the ability to work with data.

Extend beyond connecting into operations governance, data quality and customer life cycle management. All within the same application.

Pre-Built Connections from Put it Forward® enable Oracle Eloqua® users to rapidly connect to other systems such as Twitter®, Salesforce®, SAP®, Microsoft Dynamics®, Netsuite® and many more. Helping improve operations, increase data quality and minimize IT costs while enabling their goal of having a deeper more meaningful customer experience.
